1 [Communication and management support in system development environments](#)

Beverly I. Kedzierski

March 1982 **Proceedings of the 1982 conference on Human factors in computing systems**

Publisher: ACM Press

Full text available: [pdf\(579.29 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

A System Development Support Environment that assists in communication and management tasks of software project members should aid the development of large, evolutionary computer systems. The environment proposed in this paper will include integrated capabilities for project management, system evaluation, documentation/help, and intelligent communication between designers/users, and either the system or other designers. The goal is to have the environment help collect, organize and dissemin ...

Keywords: Artificial intelligence, Human-computer interfaces, Knowledge representation, Knowledge-based systems, Programming environments, Project management, Software engineering, Software psychology, System development support

2 [Distributed vs. centralized computing a regional college center at the crossroads](#)

Ronald Blum

November 1980 **Proceedings of the 8th annual ACM SIGUCCS conference on User services SIGUCCS '80**

Publisher: ACM Press

Full text available: [pdf\(137.95 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

In this paper we will discuss some of the preliminaries that led up to the final drafting of a Request For Proposal (RFP) for a new system and a few of the pros and cons of distributed vs. centralized computing as they appeared to us. The creation of the RFP is nearly complete and we expect to be well into the decision-making process by November, hence this document must perforce be somewhat incomplete at this time.

1 [CCF: Collaborative Computing Frameworks](#)

V. Sunderam, S. Y. Cheung, M. Hirsch, S. Chodrow, M. Grigni, A. Krantz, I. Rhee, P. Gray, S. Olesen, P. Hutto, J. Sult

 November 1998 **Proceedings of the 1998 ACM/IEEE conference on Supercomputing (CDROM) Supercomputing '98**

Publisher: IEEE Computer Society

 Full text available: [html\(31.52 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

CCF (Collaborative Computing Frameworks) is a suite of software systems, communications protocols, and tools that enable collaborative, computer-based cooperative work. CCF constructs a virtual work environment on multiple computer systems connected over the Internet, to form a Collaboratory. In this setting, participants interact with each other, simultaneously access and operate computer applications, refer to global data repositories or archives, collectively create and manipulate documents o ...

2 [Letters to the editor: VR for public consumption: workshop at IEEE VR 2004](#)

Newton Lee

 January 2004 **Computers in Entertainment (CIE)**, Volume 2 Issue 1

Publisher: ACM Press

 Full text available: [pdf\(59.18 KB\)](#) Additional Information: [full citation](#), [abstract](#)

Artists and educators using immersive virtual reality are interested in creating content for the general public. Such activity has always existed alongside hard-core VR research. Publicly-accessible VR presents difficulties not faced in research with small groups of knowledgeable users or in industrial VR applications. We believe these problems must be addressed to bring VR to the public:

- Making quality VR affordable by galleries, schools, arcades, etc.
- Ea ...

1 [Languages & Authoring for the Semnatic Web: Authoring and annotation of web pages in CREAM](#)

Siegfried Handschuh, Steffen Staab

May 2002 **Proceedings of the 11th international conference on World Wide Web WWW '02**

Publisher: ACM Press

Full text available: pdf(764.65 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citings](#), [index terms](#)

Richly interlinked, machine-understandable data constitute the basis for the Semantic Web. We provide a framework, CREAM, that allows for creation of metadata. While the annotation mode of CREAM allows to create metadata for existing web pages, the authoring mode lets authors create metadata --- almost for free --- while putting together the content of a page. As a particularity of our framework, CREAM allows to create *relational metadata*, i.e. metadata that instantiate interrelated defini ...

Keywords: RDF, annotation, metadata, semanticWeb

2 [Technical Papers: CREAM: creating relational metadata with a component-based, ontology-driven annotation framework](#)

Siegfried Handschuh, Steffen Staab, Alexander Maedche

October 2001 **Proceedings of the 1st international conference on Knowledge capture K-CAP '01**

Publisher: ACM Press

Full text available: pdf(270.14 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citings](#), [index terms](#)

Richly interlinked, machine-understandable data constitutes the basis for the Semantic Web. Annotating web documents is one of the major techniques for creating metadata on the Web. However, annotation tools so far are restricted in their capabilities of providing richly interlinked and truely machine-understandable data. They basically allow the user to annotate with plain text according to a template structure, such as Dublin Core. We here present CREAM (Creating Relational, Annotation-based M ...

SEARCH

Nothing Found

Your search for **+abstract:discussion +abstract:document +abstract:creating +abstract:request +abstract:user +abstract:attribute** did not return any results.

You may want to try an [Advanced Search](#) for additional options.

Please review the [Quick Tips](#) below or for more information see the [Search Tips](#).

Quick Tips

- Enter your search terms in lower case with a space between the terms.

sales offices

You can also enter a full question or concept in plain language.

Where are the sales offices?

- Capitalize proper nouns to search for specific people, places, or products.

John Colter, Netscape Navigator

- Enclose a phrase in double quotes to search for that exact phrase.

"museum of natural history" "museum of modern art"

- Narrow your searches by using a **+** if a search term must appear on a page.

museum +art

- Exclude pages by using a **-** if a search term must not appear on a page.

museum -Paris

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

museum +"natural history" dinosaur -Chicago
